

# Anti-Human IgE, AlpHcAbs<sup>®</sup> Goat antibody(HRP)

## Summary

Code	023-407-005
Immunogen	Human IgE
Host	Alpaca pacous
Isotype	VHH domain of alpaca IgG2b/2c fused to goat IgG Fc(mutation)
Conjugate	HRP
Specificity	Human IgE
Cross-Reactivity	Does not bind to human IgG, IgA, IgM
Purity	Recombinant expression and Affinity purified
Concentration	1mg/ml
Formation	Liquid, 10mM PBS(pH 7.5), 0.05% sucrose, 0.1% trehalose, 0.01% proclin300,50% Glycerol
Storage	Store at -20 °C(Avoid freeze / thaw cycles), Stable for 12 months at -20°C

## Description

Anti-Human IgE, AlpHcAbs<sup>®</sup> Goat antibody(HRP) is designed for detecting human IgE specifically. Anti-Human IgE, AlpHcAbs<sup>®</sup> Goat antibody(HRP) is based on monoclonal, recombinant, goat IgG Fc fused single domain antibody to human IgE coupled to HRP. Based on immunoelectrophoresis and/or ELISA, Anti-Human IgE, AlpHcAbs<sup>®</sup> Goat antibody(HRP) reacts with human IgE selectively.

## Background

In mammals, antibodies are classified into five main classes or isotypes – IgA, IgD, IgE, IgG and IgM. They are classed according to the heavy chain they contain – alpha, delta, epsilon, gamma or mu respectively. IgE is the class of antibodies produced in the lungs, skin, and mucous membranes. It may protect against parasite invasion, but it is a major factor in allergic reactions. The antigen-specific IgE interacts with mast cells and eosinophils, triggers the release of histamine, leukotrienes and other substances that lead to the itching, sneezing and congestion of allergies - and the life threatening respiratory distress of asthma and anaphylactic shock.

Using antibody with Fc(mutation), the background from Fc receptors will be eliminated.

## Benefits

High lot-to-lot consistency  
 Increased sensitivity and higher affinity  
 Animal-free production

## Suggested Working Concentration

ELISA 1:5000-1:20000

Dilution factors are presented in the form of a range because the optimal dilution is a function of many factors, such as antigen density, permeability, etc. The actual dilution used must be determined empirically.
